Education

University of Rochester

B.S. Computer Science, AI Concentration; Math Minor

Rochester, NY

Aug. 2025 – May 2029

- Relevant Coursework: Data Structures and Algorithms, Discrete Mathematics, Linear Algebra and Differential Equations
- Planned Clusters: Computational Linguistics, Ethics of Technology
- Current GPA: 3.6

Experience

Langston Woods Software Services (Freelance)

Founder / Web Developer | Astro, Netlify, Sveltia CMS

Remote

Apr. 2026 – Present

- Founded and operate a freelance web development business, designing and shipping production websites for 3 small-business clients using Astro as the primary framework
- Deploy and maintain client sites on Netlify with Sveltia CMS for client-managed content, owning the full project lifecycle from scoping through launch and post-launch support

Academic Intervention Specialist

Vertus High School

June 2022 – Present

Rochester, NY

- Provide one-on-one and small-group support in math and science to 25+ high school students per summer session, resulting in an average grade improvement of 15%
- Collaborate with 10+ teachers to reinforce classroom instruction and develop individualized learning strategies for at-risk students, improving student engagement by 40%
- Monitor student progress through weekly assessments, with 80% of students reaching grade-level proficiency and 87% of surveyed educators reporting significant academic improvement

Marketing and AI Intern

Thomas Media Group

June 2026 – Aug. 2026

Rochester, NY

- Design, test, and implement AI-powered workflow automations using n8n and the Google Cloud SDK to improve operational efficiency across internal business processes
- Support and optimize internal technology infrastructure spanning CRM, project management, design, and AI platforms, including HubSpot, Asana, Figma, Claude, and ChatGPT
- Collaborate with cross-functional teams to identify process bottlenecks and evaluate technical solutions, contributing technical documentation and process guides to support adoption

Projects

PromptDesk | TypeScript, Next.js, React, PostgreSQL (Prisma/Supabase), Stripe

Jun. – Aug. 2026

- Built a full-stack, multi-tenant CRM for freelancers with owner-scoped data isolation enforced at the query layer, validated by a 29-file, ~4,600-line test suite covering business logic, database ownership rules, and Stripe webhook signature verification
- Designed a dependency-free prompt-generation pipeline that deduplicates CRM records via Jaccard similarity, scores them with a weighted composite of recency decay, deal value, and objective relevance, and greedily allocates results against a token budget
- Integrated a read-only Stripe sync (webhooks + restricted API keys, AES-256-GCM encrypted credential storage) with idempotent charge processing keyed on payment-intent ID to prevent double-counted revenue

Exbo | TypeScript, React, React Router, PostgreSQL, CSS

Mar. 2026

- Developed a full-stack forum and social media web application enabling users to create accounts, post threads, and engage in community discussions, deployed on Vercel
- Architected a relational database schema using PostgreSQL with custom PL/pgSQL functions to handle user authentication, thread storage, and dynamic content retrieval
- Built a responsive multi-page frontend with React and React Router, implementing client-side routing for seamless navigation across posts, profiles, and community feeds

Technical Skills

Languages: Python, Java, TypeScript, JavaScript, HTML/CSS, SQL

Frameworks & Libraries: React, Next.js, Astro, React Router, Prisma

Databases & Tools: PostgreSQL, Supabase, Git, GitHub, VS Code, Vercel, Netlify, Stripe, Vitest, n8n, Google Cloud SDK
